

I would like to keep Airl online and put my will against the new FCC policy because it hurts my availability for Airl. Airl serves our community by providing positive worship for my day, driving is very stressful and it helps my community by allowing me to not drive my car into a building in frustration. If Airl were replaced by another LPFM broadcaster it would not be the quality it is now, would most likely be turned into the crap the kids listen to now that I can't stand. Airl is certainly in the public interest because my car does not have a CD player and I need to worship during the day.
